

AGATA STANDARD

Wall-Mounted Audio & Audio Receiver/Video Monitor

Agata is the latest generation of handset receiver. Available in either the audio entry system or video entry system versions, the latter with a 3.5" black and white or colour LCD display, Agata is designed for wall mounting with a dedicated support, and it can be used for the X1 2-wire system, for the XIP or System 300 digital systems or for the 200 multi-wire system. All the models share their ease of use, functionality, clean-cut design and silhouette and continuity of style in keeping with the other new-generation models designed by BPT.

- 3.5" LCD display (colour or B&W)
- Installation on the wall with special support
- 2 versions: colour and monochrome
- Extra-slim design
